SUMMARY

Beginning my journey as a software developer and seeking to apply my education and previous work experience to pursue practical knowledge in a progressive development environment.

SKILLS

- | | | | |
|--------------|--------------|-------------------|---------------|
| • Javascript | • Express.js | • GitHub workflow | • Bootstrap |
| • Python | • MongoDB | • CSS | • Materialize |
| • React.js | • PostgreSQL | • HTML | |
| • Django | • Git | • SASS | |

PROJECTS

BoozeHound(JavaScript, jQuery) A single-page application that randomly generates a random cocktail recipe.

Method Leather(MongoDB, Express.js, JavaScript) A full-stack app for a small leather company that allows the user to create, read, update and delete custom products.

Rattlesnake Milk(MongoDB, Express.js, React, Node.js) A full-stack, single-page app used as a band website. This app consists of two complete sites that are linked to the same database. One is client facing and the other is an admin page with forms to create, update, and delete concert dates.

RAAM(Python, Django, PostgreSQL) A full-stack application used to create and locate local, community-based food pantries to donate or receive food. This app features scheduling for pick-ups/drop-offs and forms to create, update and delete inventory. *RAAM was developed in a group.*
